Description

The BONT Ballistic Wheel!

The BONT Ballistic wheel is a high end wheel at 60mm x 40mm that comes at a very affordable price. The wheel is easy to break in, has a high rebound, high grip and great wear properties. Bont sponsored skaters love this wheel! Available in 87A or 92A. The 87A is great for a lot of surfaces that are less than grippy like most of the polished concrete out there especially in colder months. 92A is a great step up durometer when you have grippier floor conditions, you improve your overall skills and/or you want a little more performance and speed! You should have both of these hardnesses of wheels in your skatebag!
